

## Certificate of Analysis

Omruildatum 22-5-2015  
Uw oorspr. order 55-01524  
Ons ordernummer 1520198  
Product SternPur S P, zonnebloemlecithine poeder  
Hoeveelheid 3.600 kg  
Batchnummer PSC012791 wordt omgeuild voor PSC012580  
THT 11/2016

| Parameter                         | Specification | Result value | Unit    |
|-----------------------------------|---------------|--------------|---------|
| Acetone insolubles                | ≥ 95          | 95,1         | %       |
| Water                             | ≤ 2           | 1,7          | %       |
| Peroxide value                    | ≤ 5           | 0            | meq/kg' |
| Acid value                        | ≤ 35          | 30,8         | mgKOH/g |
| Aerobic mesophile micro-organisms | ≤ 3000        | 220          | CFU/g   |
| Yeast                             | ≤ 100         | 10           | CFU/g   |
| Mould                             | ≤ 100         | 10           | CFU/g   |
| E.coli                            | negative      | negative     | in 1 g  |
| Salmonella                        | negative      | negative     | in 25 g |

*PCR certificate issued by independent laboratory Impetus, Bremerhaven: PIB14-005174*

No GMO labeling required according to EU regulation 1829/2003 and 1830/2003. Respective analysis has been carried out by the a.m. laboratory with EN ISO/EC 17025 certification prior to dispatch of the product. Analysis is carried out by tetra screening (35 S, NOS, ESPS, Event 305423; 50 cycles) with a detection limit of max. 0.9 %.

Analytical values can only be guaranteed within the scope of performed methods used by Stenchemie GmbH & Co.KG and results refer to the analysed sample. Reference methods of determination will be indicated on request. Further, we cannot guarantee the suitability for special applications on customer's side. The consignee is responsible for checking the given information on receipt of goods.
